Don't let safety escape!

Unforeseen calamities cannot be planned, but preparation can!

Be prepared in 2010!

In 2010, it is our pleasure, as always, to provide you with advice on optimising your evacuation plans. Good preparation will give you and your co-workers the assurance that you are well prepared for unforeseen evacuation situations.

Any altering?

Most likely, you have already received advice from one of our advisors during a demonstration, training or evacuation analysis of your building. Since then, has anything altered, in respect of your staff; are there now additional employees that now have some kind of disability and are reliant on the use of the lift? Or your building; have you moved to another building or divisions moved within your existing building? Why not contact us, in order to discuss if your current evacuation equipment and plans are still applicable.

Training

Do not forget to check that your training in the use of your equipment is up-to-date. Do you have enough helpers trained in using the available evacuation equipment? Do you think that your staff would benefit from some refresher training? This is a very cost-effective way in which to get your training back-on-track and to give your staff their well-earned confidence boost.

Condition of equipment

Is your current evacuation equipment in optimal condition? When was the last time they were serviced? Are you confident that in the event of having to use your existing equipment 'in anger', that they could meet your expectations? If your equipment has not been checked for more than 1 year, then please contact us immediately.

Continuous support

We are here to continually support you with professional on-site training and carrying out check-ups on your evacuation chairs. Don't delay the safety of you or your Colleagues, or it might be too late!

Special Offer extended

As our commitment to you, we are extending our Special Offer on check-ups on your evacuation chairs until **31 March 2010!** As a reminder, we are offering the first chair at £35.00 and every other chair after that, within the same building at £17.50. The check-up will consist of a check on your chairs (not including repairs or replacement parts). We will also check your training records and make some recommendations to you, by way of a simplified report.

We wish you at all events a happy and well prepared 2010!

On behalf of the Escape Mobility Company team,

H.L.G. van Leeuwen
Managing Director

Escape Mobility Company* - managed by Mr. H.L.G. (Herman) van Leeuwen - is specialized in evacuating people via the stairs since 1987.

Starting 2009 we established the A-Label Quality logo to make sure our products as well as our company meet the best quality. Our products are produced in The Netherlands and Germany under our own control. They are CE and TÜV certified.

In cooperation with you, our advisors facilitate evacuation solutions in your building.
We offer several types of evacuation aids.

*Manufacturer of the Escape-Chair®, the Escape-Carry Chair® and the Escape-Mattress®.

Unforeseen calamities cannot be planned, but preparation can!

Model matrix

Having carried out your risk assessments, PEEPS policies and taken the steps to invest your well earned money in evacuation equipment, making the right choice of purchasing evacuation chairs can sometimes be mind-blowing. So, take a look at our model matrix, which may help you in achieving your goal. Remember, one evacuation chair is not always suitable for everyone. That is why we offer a range of chairs, to suit your situation.
